(54) DATA BROADCAST RECEIVER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a receiver which can simultaneously display a general data broadcasting program and a specified data broadcast program by providing a first display control means for displaying a general broadcasting program on a first display unit and a second display control means for displaying the specified data broadcast program on a second display unit.

SOLUTION: When received data of an emergency program is not kept in first RAM 46, a default program is repetitively displayed on a first display 21. When the display program is changed by program selection key groups 31-36, the changed program is displayed. When the final page of the changed program is displayed, the default program is repetitively displayed again. When the emergency program is received and received data of the emergency program is kept in first RAM 46, the emergency program is displayed. When the display of the final page of the emergency program terminates, the default program is displayed.
